

## **FCGM Welcomes New Members to its Board of Directors**

*Three new members from legal, financial worlds build on organisational strengths.*

**Montréal, 11 July 2022** - The Greater Montreal Climate Fund (FCGM) announced today that after an open call for applications, and a deliberative internal process during the first financial quarter of 2022-23, three new members have been nominated and elected to the Board of Directors of Montréal's Low Carbon Cities Canada (LC3) Centre.

The three new members bring expertise in entrepreneurship, in legal affairs, business development, and investor relations, to the current board. They join Alain-Olivier Desbois, current CEO and founder of Elements Financial, and colleagues such as Philippe Dunsky, CEO of Dunsky Climat + Énergie, Eric Saint-Pierre, CEO of the Trottier Family Foundation, and the City of Montréal.

“The capabilities this group brings, add important legal expertise and deepen our financial innovation focus at the Fund” said Alain-Olivier Desbois, Chair. “As we enter a strategic pivot toward buildings, mobility infrastructure, and public policy, and as we engage new board committees, FCGM will benefit greatly from both the general private expertise and the specific oversight capabilities all of our directors bring to current investments. FCGM is uniquely positioned in Greater Montreal to play its convening and catalyzing role with private, public and philanthropic actors around the table.”

Appendix A contains biographical summaries.

*Since its incorporation in 2020, the Greater Montreal Climate Fund (GMCF) has worked to help unite and support a thriving financial and decarbonisation community. Connecting affiliated groups and partners, GMCF is poised to grow and increase our collective impact in the greater Montreal Community, as well as through the national network of Low Carbon Cities (LC3). We remain committed to this purpose and to providing support, resources, and advocacy to the larger community.*
